

Madeeha Tabassum

Data Science & AI Undergraduate

Ballari, Karnataka, India — +91 96866 75195 —
madeeha0717@gmail.com LinkedIn — GitHub

PROFESSIONAL SUMMARY

Final-year B.E. Artificial Intelligence & Data Science student with an 8.51 CGPA and hands-on experience in Python, SQL, machine learning, data analysis, and business intelligence. Experienced in data preprocessing, EDA, feature engineering, model evaluation, and dashboard development. Built an end-to-end causal ML platform for marketing uplift modeling and customer targeting. Seeking opportunities in Data Science, AI/ML, Machine Learning Engineering, and Data Analytics.

TECHNICAL SKILLS

Programming: Python, C++, OOP

Data Science & ML: Pandas, NumPy, Scikit-learn, Data Cleaning, Data Preprocessing, EDA, Feature Engineering, Model Evaluation, Uplift Modeling

SQL & Databases: SQL, PostgreSQL, DBMS, Joins, Filtering, Aggregation, Grouping

Visualization & BI: Power BI, Tableau, Dashboards, Data Visualization

Tools: Git, GitHub, Jupyter Notebook, VS Code.

EDUCATION

Bearys Institute of Technology, Mangalore

2027

B.E. in Artificial Intelligence & Data Science

CGPA: 8.51

Abdul Salam Memorial College, Ballari

2023

12th Science

82%

TECHNICAL PROJECTS

Marketing Campaign Causal Lift & Uplift Modeling Platform

GitHub

Role: Data Scientist / ML Developer — Python, Scikit-learn, Streamlit, SQLite

- Designed an end-to-end causal ML pipeline using treatment-control analysis, ATE/ITE estimation, and a T-Learner to identify customers whose purchase behavior is likely to change because of a marketing campaign.
- Built uplift-based customer segmentation and targeting, evaluating random, purchase-probability, and uplift strategies using Qini analysis and simulated ROI; uplift targeting achieved **634.67% simulated ROI** on synthetic data.

AI-Driven Multi-Disease Risk Assessment System

Ongoing

Role: ML/Data Preprocessing Developer — Machine Learning, Python

- Working in a 4-member team to develop a disease-specific risk assessment system covering heart disease, stroke, and asthma.
- Preparing datasets through missing-value handling, duplicate removal, normalization, and feature preparation for disease-specific machine learning models.

PARCEL-AI — Smart India Hackathon 2026

Role: Project Team Member- AI/ML, Computer Vision, GIS

- Developed an AI-based cadastral mapping system using drone imagery and SegFormer-B2 for automated parcel boundary extraction.
- Integrated OpenCV, OpenDroneMap, and GIS tools for image processing, topology validation, and GeoJSON/GeoPackage generation.

• EXPERIENCE & ACHIEVEMENTS

GenAI-Powered Data Analytics Job Simulation — Tata IQ via Forage

July 2026

- Performed exploratory data analysis to assess data quality and identify customer delinquency risk indicators; used GenAI-assisted analysis to interpret patterns and communicate insights.

Smart India Hackathon (SIH) Internal Hackathon

September 2, 2026

- Placed 3rd** in the 12-hour internal hackathon among participating teams.

CERTIFICATIONS

NPTEL — Data Analytics with Python (Elite Silver), 2024 — NPTEL — Software Testing, 2025

DGM Bangalore — Multi-Agent Systems Workshop,

ADDITIONAL

Languages: Urdu (Native), English (Proficient), Kannada, Hindi

Interests: Video Editing, Video Creation, AI Video Generation
